## Design for Sustainable Development: **PeaceLab Studio**

ENGE0 1024

TuTh 3:55 PM – 5:10 PM

### Instructor

Dr. Justin Henriques  
[henriqjj@jmu.edu](mailto:henriqjj@jmu.edu)

**This course focuses on developing and prototyping sustainable human-centered design solutions** for communities in low resource context. Towards this end, the course will explore practical participatory and user center design tools that involve communities in the design process, as well as current and emerging humanitarian technologies for innovations at the intersection of peace and sustainability.

This year will have a special focus on designing solutions with collaborators at Garissa University in Northern Kenya.
